wall in a manner such that said cement cavity of said mounting device is aligned with at least one cement cavity of said concrete block;

providing a cementing slurry; and

pouring said cementing slurry into said cement cavities of said concrete block and said cement cavity of said mounting device.

#### REMARKS

##### *Summary Of Current Status of Application*

On September 18, 2000 Office Action, a Request for Continued Examination was made which canceled claims 18 and 21, amended claims 19, 20, 22 and 27 and added new claims 28-46. Reexamination and reconsideration of these claims are respectfully requested in view of the above-amendments and the following comments.

##### *Status of Claims*

Prior to this amendment, claims 1-3, 5-9 and 11-19, 20 and 22-46 were pending in the above-identified reissue application with claims 1-3, 5-9 and 11-17 being original patent claims and claims 19, 20 and 22-46 being new patent claims. This amendment merely amends claims 28, 37 and 46. Accordingly, after entrance of this Amendment, original patent claims 1-3, 5-9 and 11-17 and new application claims 19, 20 and 22-46 are pending for consideration and examination. Original patent claims 1, 5 and 11 are independent claims. Also new application claims 19, 20, 23, 25, 27, 28, 37 and 46 are independent claims.

##### *Explanation of Support in the Disclosure of the Patent for the Amendments*

The amendments to claim 28 changes the phrase "three spacer members *rigidly and fixedly secured* between said first inner surface and said second inner" to -- three *rigid*

spacer members *extending* between said first inner surface and said second inner --. The amendments to claim 28 are fully supported by the patent in the specification at column 6, lines 63-67, and column 7, lines 1 and 2, in original independent claim 11, and in the drawings at Figure 3.

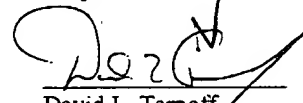

The amendments to claim 37 changes the phrase " a pair of spacer members *secured* between said first inner surface and said second inner" to -- a pair of *rigid* spacer members *extending* between said first inner surface and said second inner --. The amendments to claim 28 are fully supported by the patent in the specification at column 6, lines 63-67, and column 7, lines 1 and 2, in original independent claim 11, and in the drawings at Figure 3.

The amendments to claim 46 changes the phrase " a pair of spacer members *secured* between said first inner surface and said second inner" to -- a pair of *rigid* spacer members *extending* between said first inner surface and said second inner --. The amendments to claim 28 are fully supported by the patent in the specification at column 6, lines 63-67, and column 7, lines 1 and 2, in original independent claim 11, and in the drawings at Figure 3.

\* \* \*

By the above amendments to the claims, Applicant is hereby seeking to correct an error in the issued patent. Specifically, in the issued patent the allowed claims were overly narrow and did not adequately claim the disclosed subject matter.

Respectfully submitted,

  
David L. Tarnoff
